General information

With this extensive style package you are always in "best accompaniment" when playing on your SEMPRA! The new **AMADEUS Style Performance (ASP)** was developed in cooperation with our partner VIVA MUSICA. The professional entertainers Christoph Alexander and Claus Riepe have put together an exclusive and sonorous style and preset package for the SEMPRA instruments with a lot of experience and love of detail. The AMADEUS Style Performance 1 offers you:

- 33 fantastic ASP styles, each with 4 dynamic variations!
- 36 new CA live sounds for the accompaniment and of course for your live playing!
- 33 ASP-SONGS with example presets each for direct playing
- 13 title-related ASP SONGS with example presets

requirements

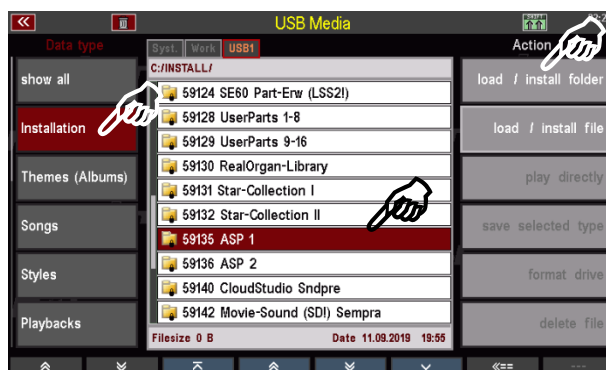

To ensure that the presets sound exactly as they were programmed, your SEMPRA should be equipped with the Drawbar sound module **RealOrgan 2.0** and the **DSP extension** for Amadeus (Art. No. 41115).

If these extensions are not available, there may be slight deviations in some presets if drawbar sounds or Amadeus effect sounds (FX sounds) have been used..

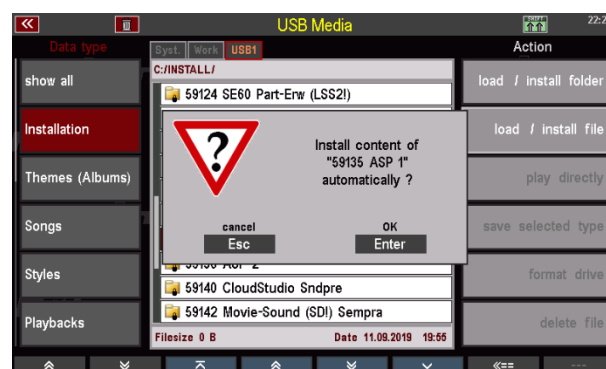

Installation

In addition to the styles and SONG presets, the ASP 1 also includes a sound bank with 36 new sounds and the corresponding sound preset bank for your SEMPRA. All ASP 1 data is installed into the instrument from the USB stick belonging to your SEMPRA with the factory data:

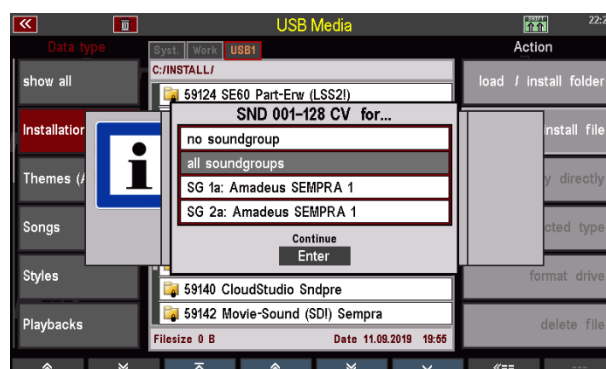

- Insert the USB stick into one of the USB sockets on your SEMPRA.
- Press the USB button to open the USB menu in the display.
- Tap on the **Installation** data type on the left (the field is displayed in red).
- Use the data wheel or the **up/down cursor keys** to move the cursor to the **"59135 ASP 1"** folder (do not open the folder!).
- Tap on the **"Load/install folder"** field on the right.

- The display asks if you really want to install the data. Confirm with **[Enter]**.
- The data will now be loaded. You can then exit the USB menu again (press **[ESC]** or **[USB]**).

- Now the ASP-1 styles are loaded first (see display).
- Then the sound data for the AMADEUS sound system(s) are loaded. If your organ is equipped with several AMADEUS sound systems, the display will ask you in which sound system the sound data should be installed. Select **"All sound systems"** and confirm with **[Enter]**.

- After the sound data the Sound Presets and the SONGS of the ASP 1 are loaded. After that the installation is finished.

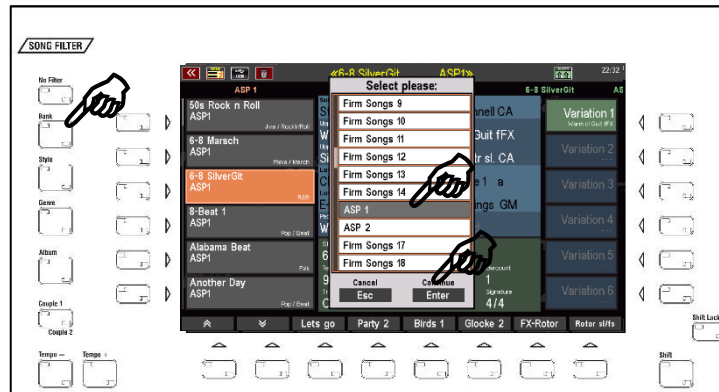

The ASP 1 data is now loaded and can be used.

Attention: Please note that factory data, including ASP 1, are always installed for specific accounts. If you use additional user accounts on your SEMPRA and the ASP 1 data is also to be used in these accounts, you may have to perform the installation again for these additional accounts!

Where can I find the ASP 1 data?

The **ASP 1 SONGS** with the example presets can be found in the **Firm SONG bank 15 "ASP"** (internal bank no. 115). Call up this bank e.g. via the **SONG filter** button **[Bank]** (press twice if not already selected) and then scroll to the corresponding bank position.

Confirm with **[Enter]**. The SONG list on the left of the display now shows the ASP 1 SONGS.

Alternatively, you can call the **STYLE BASICS** genre for the SONG list. All **ASP 1 SONGS** are assigned to this genre.

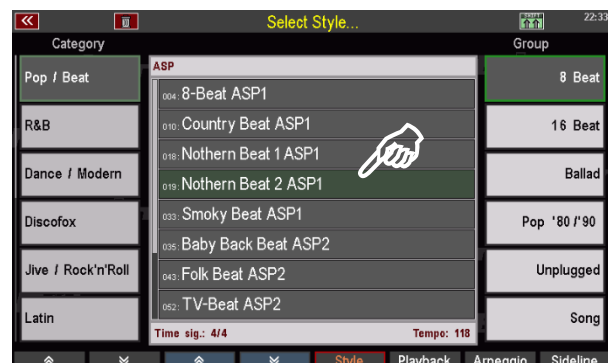

Press the **SONG Filter** button **[Genre]** (press twice if necessary, if not already selected) and select the genre **"Style Basics"** from the list.

Confirm with **[Enter]**. The SONG list on the left now shows the SONGS of the genre "Style Basics", here among others the ASP SONGS.

SONGS of ASP packages can be identified by the abbreviation **ASP1** or **ASP2...** in the SONG name.

The **ASP1-STYLES** occupy the Firm-Stylebank 11 (ASP). They are assigned to the corresponding categories and sub-groups in the style selection. You can recognize ASP styles in the style selection by the abbreviation **ASP1** or **ASP2** in the style name.

Overview AMADEUS Style Performance 1

STYLES (Firm Style Bank 11)

Bank	Number	Name
111	001	50s Rock n Roll ASP1
